NZEA Member Special Certified Handlers Certificate (Embalmers Class 6)

Bring your knowledge as a Certified Handler up to date with the latest regulations relating to Acutely Toxic Substances (6.1A and 6.1B)

This **moderated course** builds upon your existing practical knowledge and experience to become (or renew) your Certified Handler Certification.

The course is specifically customised for Embalmers. This includes all new regulations and industry developments.

Sabbath Training
IN PARTNERSHIP WITH
Skill Point

Section 4.1 of Hazardous Regulations 2017 states that only a Certified Handler can handle HSNO class 6.1A and 6.1B.

Section 206 of the HSWA states that a PCBU must not direct or allow a worker to carry out work, if regulations require the work to only be carried out by a person who is authorised (e.g., Certified Handler)

Breaches of Section 206 can lead to fines:

- for an individual, up to \$20,000:
- for any other (PCBU or Officer), up to \$100,000.

Key Learning outcomes: Certified Handlers Certificate (Embalmers)

- ✔ Demonstrate working knowledge and experience in handling Class 6.1A/6.1B substances in the workplace
- ✔ Demonstrate knowledge and experience in Inventory Control and Storage (tracking and application records, labelling, and signage)
- ✔ Demonstrate knowledge of the Hierarchy of Controls to manage associated risks
- ✔ Demonstrate knowledge in reading and interpreting Safety Data Sheet
- ✔ Demonstrate knowledge of emergency responses

The course meets the requirements of Parts 4.3 of the Hazardous Substances Regulations 2017

Key Learning outcomes: Chemical Awareness Training

- ✔ Demonstrate knowledge of workplace hazardous substances classification and associated risks
- ✔ Demonstrate knowledge of storage, handling, and disposals
- ✔ Demonstrate knowledge of workplace emergency responses

The course meets the requirements of Parts 4.5 of the Hazardous Substances Regulations 2017
